INVESTING IN THE FUND INVOLVES A HIGH DEGREE OF RISK, INCLUDING THE RISK THAT YOU MAY RECEIVE LITTLE OR NO RETURN ON YOUR INVESTMENT OR THAT YOU MAY LOSE PART OR ALL OF YOUR INVESTMENT. The Fund's distributions may be funded from unlimited amounts of offering proceeds or borrowings, which may constitute a return of capital and reduce the amount of capital available to the Fund for investment. A return of capital to shareholders is a return of a portion of their original investment in the Fund, thereby reducing the tax basis of their investment.

Investing involves risk. Investment return and principal value of an investment will fluctuate, and an investor's shares, when redeemed, may be worth more or less than their original cost. Fixed income investing entails credit and interest rate risks. When interest rates rise, bond prices generally fall, and the Fund's share prices can fall. Below-investment-grade ("high yield" or "junk") bonds are more at risk of default and are subject to liquidity risk. Credit instruments that are rated below investment grade (commonly referred to as "high yield" securities or "junk bonds") are regarded as having predominantly speculative characteristics with respect to the issuer's capacity to pay interest and repay principal. Collateralized loan obligations (CLO's) are debt instruments but also carry additional risks related to the complexity and leverage inherent in the CLO structure. Because of the risks associated with investing in high yield securities, an investment in the Fund should be considered speculative. Some of the credit instruments will have no credit rating at all. The Fund may invest in loans and the value of those loans may be detrimentally affected to the extent a borrower defaults on its obligations. Senior loans are typically lower-rated and may be illiquid investments, which may not have a ready market. Investments in lesser-known and middle-market companies may be more vulnerable than larger, more established organizations.

Leverage (borrowing) involves transaction and interest costs on amounts borrowed, which may reduce performance. Foreign investments may be volatile and involve additional expenses and special risks, including currency fluctuations, foreign taxes, regulatory and geopolitical risks. The Fund is classified as "non-diversified" and may invest a greater portion of its assets in the securities of a single issuer.

The mention of specific currencies, securities, issuers or sectors does not constitute a recommendation on behalf of the Fund or Carlyle. Prior to November 4, 2019, the Fund's name was the OFI Carlyle Private Credit Fund.

At an in-person meeting of the Board held on September 23, 2019, the Board, including all of the Independent Trustees, approved the new Investment Advisory Agreement between the fund and Carlyle Global Credit Investment Management ("CGCIM"). After considering the Board's recommendation, the holders of a majority of the fund's outstanding voting securities as of September 24, 2019 approved the new Investment Advisory Agreement by written consent, effective October 24, 2019.

At a meeting of the Board held on March 13, 2020, the Board, including all of the Independent Trustees, approved an amended and restated investment advisory agreement between the Fund and CGCIM, effective April 1, 2020, which made certain changes to the management fee structure that will result in management and incentive fees equal to or less than those payable under the Prior Advisory Agreement.
